

Listos California Disaster Preparedness

Our Disaster Preparedness training program equips individuals and groups with the essential skills and knowledge to handle emergencies effectively.

We cater to a diverse audience, including teachers, in-home service providers, students, the elderly, disabled individuals, the unhoused, community members, and local organizations.

Our free training sessions ensure that everyone, regardless of their background or circumstances, has access to potentially life-saving information and strategies. We are also available for community resource events where we supply Disaster Preparedness materials as well as items to get community members started on their go bag or stay box. Whether you have a group of 1 or 1000 we are here to serve and educate our communities on Disaster Preparedness.
